

A WEBSITE THAT GETS YOUR PHONE RINGING — AND YOU NEVER HAVE TO THINK ABOUT IT.

Fast, no-nonsense websites for trades and local businesses around Cambridge — built, hosted, and kept running so your phone gets tapped when someone nearby searches for what you do.

NEED A WEBSITE THAT JUST WORKS?

Your phone rings — you never think about the website. I build fast, no-nonsense websites for trades and local businesses around Cambridge, then keep them running, updated, and showing up on Google, so you never have to think about them again.

Every site: loads fast, looks right on every phone, and shows up on Google. Flat price, in writing, before the work starts.

THEN NEVER THINK ABOUT IT AGAIN

Every site comes with a care plan from **\$50/month** — hosting, security, updates, and a real person who answers when you need something changed. Text me the change; it's live within two business days. And each month you get a plain-English report: how many people visited, and how many tapped your phone number.

WHO AM I?

I teach wood shop at the local high school and build websites for the trades on the side. I speak contractor, not tech. If you've hired my graduates, you already know my work. Your domain is always yours — guaranteed in the agreement.

One extra job a month pays for everything.
